

Travel Consulting company ERD

- Assumptions:
- 1. We assume that historical team-to-region assignments are stored as separate records in the associative table.
 - 2. We assume that a consultant may temporarily have no calls to answer

DVD rental company ERD

- Assumptions:
- 1. Each branch is assumed to have exactly one manager at any given time.
 - 2. The manager of a branch must be a staff member assigned to that same branch.
 - 3. The maximum rental limit of ten DVDs per member is treated as a business rule and is not presented in the ERD.
 - 4. The ERD avoids redundant storage of movie titles and member names, as such information can be derived through defined relationships.
